Having had as student The young Robert Telson
it gives me a real joy to say how impressed we have
been by his gifts, his intelligence, his kindness too - We
feel he deserves to be encouraged, for he is a born musician
a natural ear + a charming sensibility - What will his
orientation be, no one can say now - But whatever the
field in which he will enter - he will every where appear
as a spontaneous musician - He will become also a very
good organist. It must be added that he is cooperative
always ready to render service. We hope he will come back next
year - he has made such progress in three short two months
